To whom it may concern,

Fabian Sanabria has been working for us in our high end furniture and lighting business.

He has been working here for one and a half years during which time he has worked on Console tables, dining tables, side tables, and coffee tables. He has also fabricated our Branch Mesh Chandeliers and standing lights and our branch wall sconces and mica lights as well as many custom designs including bathroom cabinets. You may view these pieces on our website.

During this time we have found him to be 100% honest and hard working and very skilled in all types of welding and especially good at detailing and finishing.

Fabian has high organizational skills and not only rearranged our workshop but suggested better machines and equipment which improved production and product.

We are only letting Fabian go as our business is very slow.

Please feel free to call me if you have any other questions. 917-2399170

Thanks
Marsia Holzer
